International Sports Groundbreakers Challenge (2nd Edition) – Problem Statements

S/N	Problem Statement	Innovation Scenario
PS 1	Connect sport organization departments efficiently for data lake (Soccer)	High Performance, Fitness and Health
	How can we generate a data lake so that every department in a sport organization is connected and can get access to it in a more efficient way?	
PS 2	Understand player actions respectfully via technology (Soccer)	High Performance, Fitness and Health
	How can technology contribute to a better understanding of the player's actions of work time while keeping a respectful and non-invasive perspective?	Treatti.
PS 3	Monitor individual hydration using technology (Soccer)	High Performance, Fitness and Health
	How can technology help to monitor hydration status from an individual perspective?	
PS 4	Transition players using tech from different sports (Soccer)	High Performance, Fitness and Health
	How can we use technology to monitor players from other sports to transition for more suitable sports for them?	
PS 5	Foster year-long loyalty with fans (Basketball)	Fan Engagement
	How can we build more loyalty with the fans during the whole season? Not just for specific competitions.	
PS 6	Increase youth cricket participation (Cricket)	High Performance, Fitness and
	How might we significantly increase the number of young kids playing cricket?	Health
PS 7	Balance sport & entertainment in BBL (Cricket)	Fan Engagement
	How might we strike a better balance between sport & entertainment in the BBL to retain more fans?	
PS 8	Make cricket app premier (Cricket)	Fan Engagement
	How might we make our fan app the #1 destination for cricket fans?	
	fans?	

PS 9	Digitize racing venues for better experience (Equestrian)	Fan Engagement
	How do we best digitize racing venues and enhance the venue experience?	
PS 10	Create connected Horse Racing venue (Equestrian)	Smart Venues & Sustainability
	Create a connected venue for Horse Racing that monitors and reports on its usage to ensure it operates at a high level. Ensuring the venue is comfortable, safe, secure and efficient	
PS 11	Tailor experiences for Horse Racing patrons (Equestrian)	Business Insights
	In the context of Horse Racing, understand our patrons and participants better so we can create a tailored experience that meets their needs.	
PS 12	Digitally deliver services in real-time (Equestrian)	Business Insights
	How to deliver services digitally to connect with customers easily, efficiently and in real time?	
PS 13	Enhance audiovisual content for fans (Soccer)	Media & Sponsorship
	How to enrich audiovisual content from content from content creation, new content, data and statistics generation, new forms of content consumption, etc. all impacting on an enriched fan experience and increased engagement with sporting events.	
PS 14	Improve in-venue fan experience (MMA)	Fan Engagement
	How to enhance the in-venue fan experience tp provide fans with interactive features on their mobile devices (or separate devices) while attending live events?.	
PS 15	Use tech for matchmaking athlete monitoring (MMA)	High Performance, Fitness and
	How can we use modern solutions to help competition and matchmaking teams keep a hawk eye on athletes before and during fight week to de-risk the process of matchmaking.	Health
PS 16	Label MMA positions via video processing (MMA)	High Performance, Fitness and
	Can video processing be able to accurately label based on MMA positions and movements of the fighters to identify different fight styles of athletes?	Health

PS 17	Heat map large stadium movement (Soccer)	Smart Venues & Sustainability
	How to accurately monitor the movement of fans and staff within a large stadium with a seating capacity of 80,000 using heat mapping based on video streams and/or MAC addresses of mobile devices?	
PS 18	Enhance player injury prediction sans wearables (Soccer) How can technology enhance the injury prediction of players without using wearables?	High Performance, Fitness and Health
PS 19	Develop reliable HRV monitoring in soccer (Soccer) How can we address the critical need for a reliable, non-intrusive, and robust HRV monitoring device that can be effectively utilized during soccer gameplay to enhance the health, well-being, and overall safety of athletes?	High Performance, Fitness and Health
PS 20	Unified platform for event management (Soccer) How can we address the necessity of an unified platform that simplifies event management, enhances communication, ensures accessibility, supports eco-friendly practices, and provides centralized access to critical event information, ultimately improving the overall event experience for organizers, participants, and attendees?	Smart Venues & Sustainability
PS 21	Diversify events at large venues (Multisports) How can we leverage the Singapore National Stadium or other large venue(s) to diversify our event offerings without compromising on the intimate fan experience through adaptive capacity configuration?	Smart Venues & Sustainability
PS 22	Digitally monitor swimming pool water quality (Swimming) How can we develop a cost-effective, accurate, and digital solution to capture water quality readings at the Front of the Pool (FOP) of swimming pools, integrating an early warning system and/or a fail-safe mechanism that activates when sensors and instruments deviate from calibration, ensuring public health and reducing waste?	Smart Venues & Sustainability

PS 23	Empower individual fitness tracking (Multisports)	High Performance, Fitness and Health
	How can we scale our capabilities and capacities, so as to empower individuals to measure their own status of fitness, health, posture, and/or movement and performance quality independently?	
PS 24	Self-sustaining ActiveSG Circle (Multisports)	High Performance, Fitness and Health
	How can ActiveSG Circle become a truly self-sustaining nexus where consumers can easily find opportunities to play either physically or virtually? How can industry players or content creators monetise their offerings?	
PS 25	Measure reach of streamed football (Soccer)	Business Insights
	How may we develop a reliable and precise method for measuring the audience reach of streamed football matches on online platforms?	
PS 26	Optimize sports event organization using data (Multisports)	Smart Venues & Sustainability
	How can we use data to optimize the organization of sport events to ensure high standards?	
PS 27	Track judges' scores effectively (Gymnastics)	High Performance, Fitness and Health
	How might we create an effective tracking system for judges' scores that not only examines the gap between perception and reality to determine potential biases but also plays a crucial role in cultivating trust and respect, thereby fostering a significant culture change within the judging community?	
PS 28	Sustainable mobility at major events (Multisports)	Smart Venues & Sustainability
	Presenting sustainable solutions to enhance mobility while respecting the biodiversity of the surroundings at major sporting events (World Cup Events and similar sporting events).	
PS 29	Increase lawn bowls awareness & participation (Lawn Bowls)	Fan Engagement
	How to cultivate broader awareness and understanding of the sport to encourage increased participation? How to effectively reach out to new audiences and build their interest in lawn bowls?	

PS 30	Maximize lawn bowls venue usage (Lawn Bowls)	Fan Engagement
	How to maximize the usage and occupancy of existing venues and greens, ensuring efficient utilization and accessibility for lawn bowls enthusiasts.	
PS 31	Expand coach pool using technology (Multisports)	High Performance, Fitness and Health
	How can we tackle this challenge, leverage on technology and solutions (E-learning etc.) to increase the pool of coaches, incentivize, foster and educate coaches at all levels, in partnership with National Federations and the Ministry of Sport?	
PS 32	Enhance women's talent pool in sports (Multisports)	High Performance, Fitness and Health
	How can we tackle this challenge, leverage on technology and solutions (tech based campaigns, marketing and promotion??) to maximize opportunities for, and increase the pool of women's talent, in partnership with National Federations and the Ministry of Sport?	
PS 33	Adapt sports broadcasting for audience retention (Fencing)	Media & Sponsorship
	Retaining Audience Engagement: How can sports broadcasters adapt traditional programming to sustain and heighten audience interest amidst the evolving digital landscape?	
PS 34	Innovate broadcasting for enriched content (Fencing)	Media & Sponsorship
	What innovative strategies can broadcasters employ to redefine their relationship with audiences in the digital era, offering enriched and compelling content beyond conventional formats?	
PS 35	Create captivating sports content (Fencing)	Media & Sponsorship
	Given the scarcity of performance data beyond scoring, how can sports entities leverage available information and innovative approaches to create captivating content that resonates with viewers' changing preferences and demands for enriched experiences?	
PS 36	Innovate programming with scoring data (Fencing)	High Performance, Fitness and Health
	How can sports broadcasters leverage limited available performance data, particularly scoring statistics, to innovate and enrich traditional programming, ensuring sustained audience interest and engagement amidst the changing landscape of digitalization?	
PS 37	Personalize content for fans with limited athlete data (Fencing)	Fan Engagement
	How can sports organizations effectively create and deliver personalized content tailored to individual fans' preferences across	

	various social media platforms, considering the scarcity of comprehensive athlete/player data?	
PS 38	Overcome data scarcity for engaging content (Fencing)	High Performance, Fitness and
	How can sports entities overcome the lack of adequate and easily accessible data on athletes/players to develop engaging fancentric content and initiatives that resonate with diverse fan bases?	Health
PS 39	Nurture talents for broader fan base (Fencing)	Fan Engagement
	What innovative approaches and sustained initiatives can sports organizations implement to nurture emerging talents, elevate individual players into stars, and consequently, attract and engage a broader fan following within the sports ecosystem?	
PS 40	Tech services for varying digital regions (Soccer)	Business Insights
	How can we provide tech services to our federations when the 3 different regions we need to serve (North America, Central America, and Caribbean), have a very different level of digital maturity, infrastructure, connectivity, and resources.	
PS 41	Integrate spectator data into secure digital systems (Triathlon)	Media & Sponsorship
	How can sports and entertainment rightsholders effectively capture, process, and integrate spectator data from physical attendance or television viewership into a secure and privacy-respecting digital ecosystem?	
PS 42	Modern communication for smaller rightsholders (Triathlon)	Fan Engagement
	How can smaller rightsholders in the sports and entertainment sector overcome the obstacle of limited resources to effectively establish tailored and modern communication solutions for meaningful engagement with fans and participants?	

Engage diverse audience for fan loyalty (Swimming)	Fan Engagement
How can organizations effectively captivate and retain a diverse and digitally fragmented audience base to enhance fan engagement, thereby increasing attendance, loyalty, and revenue generation amidst fierce competition for attention and interaction?	
Adapt to changing content consumption (Swimming)	Fan Engagement
How can organizations strategically adapt to the constantly changing dynamics of content creation, distribution, and consumption influenced by shifting consumer behaviors, emerging technologies, and the proliferation of digital platforms, in order to effectively meet the diverse needs of modern audiences?	
Generate commercial strategy for football clubs (Soccer)	Media & Sponsorship
How do football clubs generate demand and provide commercial strategy for brands that could be measured for return on marketing investment that show sponsorship as one of the vehicles suitable for brands?	
Develop paid digital offerings for football clubs (Soccer)	Media & Sponsorship
How can a football club develop its digital subscription and membership strategy and offering suitable to its core target audience and convince them to pay for the services?	
Unified platform for sports franchise management (Multisports)	Business Insights
How to develop a unified platform that integrates and streamlines management operations across sales, marketing, finance, and legal departments, while simultaneously incorporating Athlete Management Software features to efficiently manage diverse sports franchises, enhance communication and decision-making, and improve athlete performance and management, consolidating all functions into a single, comprehensive solution.	
Al content predictor for positive community (Multisports)	Fan Engagement
Create an Al-driven content predictor solution to forecast content engagement while mitigating trolling behavior, fostering a more positive online sports community	
	How can organizations effectively captivate and retain a diverse and digitally fragmented audience base to enhance fan engagement, thereby increasing attendance, loyalty, and revenue generation amidst fierce competition for attention and interaction? PS 49	Robust live match analysis system (Contact Sports)	High Performance, Fitness and Health
	Develop a robust live match analysis system that effectively collects automated data and tracks individual player performance, enabling comprehensive statistics generation	Health
PS 50	User-friendly app for player/coach analysis (Contact Sports)	High Performance, Fitness and Health
	Develop a user-friendly mobile application that provides players and coaches with seamless access to post-match individual and team videos, pre-match opposition analysis, and detailed gamerelated data and metrics, serving as a central hub for efficient team analysis and preparation.	
PS 51	Talent scouting platform (Contact Sports)	High Performance, Fitness and Health
	Create a comprehensive platform for talent scouting, featuring organized player databases and scouting tools. This platform should facilitate match coverage, data collection, and player tracking across various tournaments, including local and unstructured ones, enabling systematic assessment of player videos and stats for effective talent identification.	
PS 52	Video analysis software enhancement (Soccer)	Media & Sponsorship
	Develop a video analysis software to include live coding and telestration features, allowing for real-time, in-depth game analysis. This enhancement should balance advanced functionality with affordability.	
PS 53	Timely delivery of football match content (Soccer)	Media & Sponsorship
	Resolve issues with delayed content delivery, ensuring timely access to ISL and I-league matches for more effective and prompt scouting and analysis	
PS 54	Improve performance tracking software (Soccer) Refine the performance tracking software by enhancing metrics for comprehensive analysis in a cost-effective manner, aiming to combine superior metrics with better pricing for an elevated overall performance tracking experience.	High Performance, Fitness and Health
PS 55	Engaging immersive virtual world (Multisports)	Smart Venues & Sustainability
	Create a highly engaging and immersive virtual world that replicates real world spaces and experiences, incorporating realistic 3D environments that can be easily navigated by users of varying technical abilities.	

PS 56	Interactive elements in virtual environments (Multisports)	Fan Engagement
	Engineer interactive elements within the virtual environment that are both informative and entertaining, ensuring that visitors remain engaged while exploring the virtual showroom. This could	
	include interactive displays, virtual tours, and live Q&A sessions.	
PS 57	Monitor head trauma in contact sports (Multisports) Addressing the challenge of monitoring and minimizing head	High Performance, Fitness and Health
	trauma in sports like American football, ice hockey, and rugby, particularly in the absence of helmets in rugby, by innovatively integrating sensors to measure collision impact effectively.	
PS 58	WHO-guideline-based fitness app for seniors (Multisports)	High Performance, Fitness and Health
	Developing a user-friendly mobile app aligned with the WHO Guidelines on Physical Activity for age groups 18-64 years and 65+, aiming to track activities as per guidelines, offer health outcomes, and cater to seniors. Ideally, the app should be equipment agnostic and have features similar to Singapore's Healthy 365 app, creating a versatile health management tool.
